ABOUT SIGNLIGHT LED

A PROMINENT MANUFACTURER OF LED SIGN LIGHTS Where Innovation Meets Simplicity

As pioneers in the industry, we take pride in introducing our patented sign tubes, a revolutionary solution that redefined the installation experience. Our cutting-edge daisy-chain system allows you to effortlessly connect up to 20 tubes in a series, making it possible to retrofit any sign on the planet in just minutes. These tubes are crafted after two decades of field experience to address the pain points of installers, sign companies, and end users in mind, ensuring a seamless and efficient installation process.

Our Anderson, SC warehouse maintains a substantial inventory, keeping at least 2500 pieces of each size (F18-F120) in stock at all times. With a commitment to efficiency, orders received before 3:00PM EST are shipped the same day. Convenience is at the forefront of our packaging, as our products are neatly arranged in cases of 4, 8, 10, 15 and/or 20, depending on size, complete with required T-connectors and a power cable inside the box. No more guessing games - just straightforward, user-friendly solutions.

WE LIGHT UP COMMERCIAL PYLON, MONUMENT, AND OTHER SIGN CABINETS

At Signlight LED, we offer a comprehensive range of products to cater to all signage needs, From LED sign tubes and brackets to modules, power supplies and corn lamps. Our diverse selection ensures that every sign can be serviced using our top-of-the-line solutions. Our commitment to safety is evident through our products, always certified and backed by warranty for peace of mind. Our flagship products, Rapid Lamp Gen 2 & Gen 3, boast UL certification, SAM listing, IP65 rating, and an impressive double-sided design -all supported by a 5-year warranty.

Our Gen 2 tubes allow for bypassing existing wiring, making them suitable for most sign retrofit projects. With internal drivers and a daisy-chain system, sockets function as mere placeholders. Even if one tube malfunctions, your sign will stay lit until maintenance.

Our Gen 3 tubes retain all advantages of Gen 2 but are specifically tailored for menu boards and slim cabinets, featuring a unique lens designed to reduce hot spots and ensure even light distribution.

Our Rapid Brackets are designed for use with our Rapid Lamps, creating a brilliant combo. Making it possible to illuminate even the old rusty signs, or a brand new commercial pylon, monument and other sign cabinets alike. Additionally, the brackets make our tubes suitable for awnings, and other interior and exterior applications.

Our passion at Signlight LED is rooted in innovation and simplicity. We are dedicated to designing products that are not only technologically advanced but also remarkably easy to use. Join us on a journey where cutting-edge technology meets unparalleled user experience, setting new benchmarks in the world of illuminated signage.

A MESSAGE FROM THE CEO & PATENT HOLDER

DR. ISHWAR PATEL
FOUNDER & CEO

Greetings to Everyone!

At SignLight LED, we focus on providing exceptional lighting solutions for LED sign boards of various types, shapes, and dimensions. Our team comprises electrical engineers, customer service specialists, and other experts who possess significant knowledge in their respective fields.

They are dedicated to enabling entrepreneurs to maximize revenue through properly illuminated sign boards. Therefore, they put continuous efforts into designing LED lighting fixtures that offer optimal illumination and high luminous efficacy. Moreover, they leave no stone unturned in making the installation process seamless.

SignLight LED is among the reputable names in the field of LED lighting for sign cabinets and other box signs. Our visionary approach and can-do attitude have led us to achieve several milestones in our journey so far. We have built a distinctive place in the market owing to our fantastic customer service.

We strive hard to stay updated with the latest technologies and trends in LED lighting, LED sign boards, and digital signage advertising industries. Our company takes pride in working in the best interest of all stakeholders involved. We contribute to industrial betterment and environmental conservation.

Dedicated to Excellence in LED Innovations

We hold a strong belief that a decrease in the energy consumption resulting from the use of LED lights can go a long way towards reducing the carbon footprint on the planet. Sustainable lighting is the need of the hour, and LED technology has made it possible. Luminaires with LED chips have taken over the market. The ever-growing demand for LED-based lighting fixtures proves that LED is the future of lighting across the world.

The use of LED sign boards is bound to increase in the coming years, considering the energy efficiency, longer lifespan, little to no warm-up time, cost-effectiveness, and other benefits associated with LED lights. The benefits of LED lights combined with the quality of our products deliver top-notch results for signage lighting applications.

RAPID BRACKET

Versatile Mounting Brackets

Rapid mounting brackets come in multiple models, allowing you to install various sizes and types of LED tubes within the cabinet of a sign.

Back Mounting Bracket

Back mounting bracket can be used on the wall or ceiling, to add light and to light up very tight spaces. This rapid bracket can be easily used in combination with rapid lamp to light up building awning, canopy, fascia or roof line.

Side Mounting Bracket

Side mounting brackets are installed at side panels inside the LED sign board cabinet. They are used to mount LED lights on side panels inside the cabinet.

OUR LIGHTS IN RENOWNED LOGOS

WHY CHOOSE US

EASY INSTALLATION

Retrofitting signs with our Rapid Lamps is a breeze. Just cut the power, remove the old bulbs and ballast entirely, insert our Signlights LED Rapid Lamps, and connect with the included power cable and T-connectors. The installation expected to be completed in approximately 30 minutes.

TOMORROW'S INNOVATIONS

Our bulbs with internal drivers and a daisy-chain system for connecting up to 20 lamps in a series render sockets as mere placeholders. A single malfunctioning tube won't affect others, so your sign remains lit until maintenance. Check out our full product line to see how you can light up today with tomorrow's innovation.

LOWER COST

Signlight LED offers lamps that provide uniform and superior lighting for higher impact signage. Improve the presence of your business at a lower cost with our industry leading Rapid Lamps.

CHOOSE FROM A SPECTRUM OF SIZES

We offer multiple universal sizes to fit all your installation needs. Read off the "F number" from the existing fluorescent tubes to find the exact replacement from our double sided lamps with rotatable R17D ends.

VIBRANT LIGHTING & DURABILITY

Our LED bulbs provide better heat dissipation, vibrant lighting, enhanced durability, & significant cost savings over their lifespan.

SIGNLIGHTS LED ADVANTAGES

Welcome to Signlights LED! We take pride in introducing the most innovative LED Signlights tailored for your market. As pioneers, we are the first to offer our exclusive bulbs with internal drivers, setting new standards in the industry. With our exceptional product line, you can minimize your requirements for additional inventory, extra wiring, downtime, and extensive staff training. We've streamlined the process for your convenience. Experience the versatility of our multiple sizes, meticulously designed to cater to all your installation needs. Moreover, our circular tubes with double-sided illumination provide broader coverage, ensuring wider illumination areas. Embrace the advantages of our LED bulbs, which excel in heat dissipation, vibrant lighting, and durability, and deliver substantial cost savings throughout the lifespan of your sign. You can trust us to provide the ultimate solution for your signage requirements.
